

# Nio et7 solid state battery

Nio first announced the 150 kWh semi-solid-state battery at the launch of its flagship ET7 saloon in January 2021. In November 2022, the first semi-solid-state cells rolled off the production line at WeLion's factory in Huzhou.

Nio, a Chinese EV car maker, has just completed a battery challenge with its mass-produced ET7 sedan, driving for 1,044 km on a single charge. The Nio ET7 arrived at its destination with a 3% state of charge, or 36 km of range, ...
