

Off grid solar storage project financing options in Oman 2026

Will Oman have a solar energy storage system?

Additionally, PDO is finalizing plans for a 100 MW solar PV-based IPP, named the 'North Solar Storage IPP,' set to include Oman's first battery energy storage system (BESS). This BESS, using lithium-ion battery technology, will store electrical energy and supply a maximum of 100 MW peak power to PDO's grid during daylight hours.

What are some solar projects in Oman?

The Ras Madrasah Solar Plant, with a 6 MW capacity, supports local industries in the Al Wusta region. The Dhofar Agricultural Solar Project provides solar-powered irrigation for farms in southern Oman. In Al Batinah, a small 2.5 MW solar installation supplies power to remote villages.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.
