Why is energy storage a growing trend in Germany?

Volatile energy prices and the popularity of photovoltaic self-use have driven demand for residential energy storage, which is expected to continue to grow through 2030. In addition, Germany plans to hold its first capacity market auction in 2028 to boost the development of large-scale energy storage projects.

How many residential energy storage systems are there in Germany?

By September 2023, Germany has installed more than 1 million residential energy storage systems and expects to add more than 400,000 units per year in the future. Volatile energy prices and the popularity of photovoltaic self-use have driven demand for residential energy storage, which is expected to continue to grow through 2030.
