

On grid solar storage supplier quotation in New Zealand 2025

Does solar offer grid-tied solar systems in New Zealand?

However, we also design and supply grid-tied solutions through our parent company, SolarKing. All you need to do is reach out to us. Since the end of 2020, the pricing of solar systems in New Zealand for grid-tied, commercial and off-grid solar, has increased by about 25%.

How much does a solar battery cost in New Zealand?

The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget. The best value was \$9,000 for a 9.6 kWh battery, equating to \$937.50 per kWh. Indicating the batteries below \$1000/kWh can be hunted down in the NZ market. What's Next for Solar Prices in 2025?

How long does a home solar system last in NZ?

Most home solar systems in NZ pay off in less than 10 years, which means you still get 20 or more years of free energy and freedom from price hikes and blackouts. Check out this image below showing how the cost of your grid power is distributed across five different categories.

Why are solar systems so expensive in New Zealand?

All you need to do is reach out to us. Since the end of 2020, the pricing of solar systems in New Zealand for grid-tied, commercial and off-grid solar, has increased by about 25%. This is the result of supply chain constraints and price increases, inflation and the volatility of the US dollar.

What is a grid-tied solar system?

Grid Tied Solar. A grid-tied (or grid tie) system consists of a standard string inverter that does not have the capability to connect battery storage. They are becoming less popular nowadays because of this limitation. It may be worth considering if you are constrained by your budget and you do not intend to ever add battery storage.

How many kW is a solar system in New Zealand?

Unless you have access to industry modelling software and have strong experience with solar system sizing, it may be easier to seek expert help when it comes to sizing. The 'average' residential solar system in New Zealand is about 5kW of solar generation. Is a 10kW solar system appropriate for your situation? Why not 6kW? Or 12kW?
