

# PV energy storage tender price in Poland 2030

Will Poland achieve a 28.5 GW PV capacity by 2030?

As Poland races to meet its ambitious goal of 28.5 GW of installed PV capacity by 2030, the focus on utility-scale PV and battery energy storage solutions (BESS) has never been more crucial. A Booming Market Facing New Opportunities and Challenges

Are energy storage systems a new technology in Poland?

Energy storage systems are a relatively new technology in the Polish capacity market. They have participated in two auctions so far: making their official debut in 2022 (with 2027 delivery year) and subsequently dominating the competition in the 2023 auction.

When will the energy project start in Poland?

Commercial operation is expected to start in January 2027. Namely, the project has an obligation to provide energy capacity to the Polish market for 17 years starting from 2027, having been successful in the 2022 Capacity Market auction organized by the Polish Transmission System Operator (PSE).

How much solar capacity will Poland have by 2030?

Opportunities in a Growing Market Poland is projected to reach 28.5 GW of installed solar capacity by 2030, driven by utility-scale projects which are expected to grow at an impressive rate.

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

Is the short-term outlook for energy storage in Poland good?

Whatever happens, it seems the short-term outlook for storage in Poland is good--and will only get better as the country moves to address European and national climate goals. Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars.

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Zarnowiec battery energy storage project, which will ...
