

Prius battery for solar

I own a second generation Toyota Prius, and while it's a great little car, it has one fatal flaw - the 12V auxiliary battery. Unlike most cars, the 12V battery in the Prius isn't used to power the starter motor for the combustion ...

I made an interesting if minor discovery. Right before the Prius completes its charging, the power decreases by almost half. Presumably this facilitates measuring the charge state of the Prius lithium battery pack and may "top off" ...
