

Prospects of south korea s energy storage industry

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

Does South Korea have a battery storage system?

In terms of battery storage system deployment, South Korea stands among the global leaders. By the end of 2022, the cumulative installed capacity of battery storage in the country had reached an impressive 4.1 gigawatts. In October 2023, the South Korean government unveiled the Korean Energy Storage Systems (ESS) industry development strategy.

Which energy storage solutions are used in South Korea?

In South Korea, various energy storage solutions are used, including pumped hydro, electrochemical batteries, and others. Depending on the energy storage technology and delivery characteristics, an ESS can serve many roles in the electricity market.

How many pumped storage power plants will Korea have in 2021?

The hydropower capacity comprises 1,789 MW of pure hydropower and a further 4,700 MW of pumped storage as of 2021 - As per new pumped storage power plants, Korea Hydro and Nuclear Power (KHNP) has chosen three areas for development: Youngdong (500 MW), Hongcheon (600 MW), and Pocheon (750 MW).
