

Does Tunisia have a solar plan?

To face the problem of energy dependence and to fight against climate change, Tunisia launched the Tunisian Solar Plan in 2009. As previously mentioned, the country aims to install 1 GW of renewable energy to provide 12% of the country's energy needs by 2020. Its long-term objective is to achieve 3.8 GW of renewable energy capacity by 2030.

Does Tunisia have a strong solar energy potential?

Moreover, it characterises the country's energy context, relevant stakeholders, as well as regulatory framework for investment. The research finds that Tunisia has strong solar energy potential, which the government increasingly harnesses.

Why should Tunisia invest in solar energy?

With an average horizontal irradiation of around 1,850 kWh/m<sup>2</sup>/year, the country has abundant solar resources. These resources are promisingly being developed to strengthen Tunisia's energy independence, while also being leveraged for exporting clean electricity to Europe, creating value and jobs locally."

How many solar PV projects are available in Tunisia?

In May 2018, Tunisia also decided to launch a tender for five solar PV projects in the framework of the "concession regime" totalling 500 MW, which were also open to international companies. In November 2018, sixteen national and international developers have been pre-qualified for this tender. These projects will be

How much solar irradiation does Tunisia have?

average global horizontal irradiation of around 1,850 kWh/m<sup>2</sup>/year. The overall horizontal solar irradiation exceeds 1,900 kWh/m<sup>2</sup>/year in the southern half of the country and is more than 2,045 kWh/m<sup>2</sup>/year in the region of Tataouine. Tunisia therefore has significant potential for photovoltaic projects and thermal technologies.

What is the Solarpower Europe emerging markets Task Force?

Project information: The SolarPower Europe Emerging Markets Task Force was launched in March 2018 and, since then, has become an active working group of more than 120 experts from more than 60 companies.

The solar energy industry has seen a significant surge in recent years, with solar battery manufacturers playing a pivotal role in this growth. The rise in demand for renewable energy sources has led to an increase in the need for efficient and ...
