

Rooftop solar battery cost breakdown in Australia 2025

How much do solar batteries cost in Australia?

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors. Here's a breakdown of average prices.

Are solar batteries cheaper in 2025?

Integrated systems are often cheaper and more efficient than retrofitting batteries later. Overall, solar battery prices in 2025 are more affordable and more supported than ever before, especially in Australia, where both national and state-level programs are pushing the transition to clean energy storage.

Why are solar panels so expensive in 2025?

Cheap systems often cost more long term due to breakdowns, inefficiency, or required replacements. In 2025, Australians have more control than ever over how they power their homes. With generous government rebates and falling technology costs, both solar and battery storage are no longer out of reach.

Are you eligible for solar battery rebates in 2025?

In 2025, homeowners may be eligible for solar battery rebates as part of a nationwide effort to promote clean energy. These rebates are designed to make home solar batteries more affordable, particularly for systems that utilize advanced technologies like lithium-ion batteries or dc-coupled batteries.

Is a solar battery a smart upgrade for Australia's 4 million homes?

With electricity prices up 20% in NSW and Queensland since 2023, a solar battery is a smart upgrade for Australia's 4 million solar homes. The federal Cheaper Home Batteries Program slashes costs, making now the perfect time to invest.

Do solar batteries get a rebate?

Battery prices vary by brand, storage capacity, and whether they are AC- or DC-coupled. The rebate applies as a percentage of the battery system's cost, so larger batteries receive more rebate in dollar terms. Some advertised solar deals fall well below these averages.
