

Small solar battery system

A typical residential-size solar system installation will involve properly sized and installed AC and DC electrical wiring to reduce the risk of electrical fire, a proper grounding system to prevent shock and lightning damage, proper battery ...

As the title says, I'm building a VERY small solar system, and need advice. I have a small roll off roof astronomical observatory. The building is unheated. Currently, I power the observatory using a marine battery I move from my house and ...
