

Solar Panel cost vs benefit calculation in Vietnam

Can residential rooftop solar power projects be economically evaluated in Vietnam?

Although the rooftop solar power system has thrived in Vietnam in recent years, few studies on economic and technical evaluation for residential rooftop solar power projects have been in place so far. Therefore, in this article, the authors tried to present the detailed information on designing, simulating and economically evaluating the

How much does a PV system cost in Vietnam?

The excess energy from PV system is sold to the grid at a price of 8.38 cents US/kWh (equivalent to 1,916 VND/kWh) while the electricity purchase price from the state power company is based on the retail electricity tariff . Figure 1. Diagram of the typical grid-connected PV system in Vietnam 2.2.

How much solar power does Vietnam have?

According to Vietnam Electricity's data, the total installed capacity of commercial PV power projects has reached 4464 MWp by the end of June 2019, solar power accounted for 8.28% of the total installed capacity of Vietnam's power system [9]. This capacity scale has far exceeded the expected PV power development target of 850 MWp in 2020 [10].

How to choose a suitable area for solar panels in Vietnam?

The suitable area for installing PV systems is determined for each rooftop in the city while solar radiation data ((1) horizontal, (2) inclined (according to the slope and roof direction) and (3) the optimal (when slope = latitude and direction = south)) are taken from Vietnam solar energy map [33].

How many kWp rooftop solar power project in Vietnam?

8.36 kWp rooftop solar power project at household of Vietnam. The findings are The main details of the installation of the solar power system have been clearly reviewed and explained. The annual energy generated is 11,106 kWh; the amount of CO₂ saved is 174.9 tons/20 years and annual average system efficiency is 81.17%.

How long does a solar PV system last in Vietnam?

The lifetime of the PV system is estimated to be 20 years, and 10 years for the inverter. Table 5. Electricity tariffs of urban areas in Vietnam The profit generated by the solar PV system is equal to the amount of electricity sold to the utility company plus the amount of electricity consumed on a daily basis.

Solar Panel Cost Calculator: Find Your 7-10 Year Breakeven Point Calculate solar panel cost by multiplying the system size in kilowatts (kW) by the average cost per watt. In the U.S., residential solar panels cost about \$2.50 to \$3.50 ...

Solar Panel cost vs benefit calculation in Vietnam

We will go calculator-by-calculator. You can simply input your figures and the solar panel's calculators will dynamically estimate sizes, savings, and costs. Moreover, we include examples and links to articles with more in-depth ...

This solar power calculator is indicative only. It is provided to give an estimate only and general guide of the potential savings and benefits of installing and using solar panels and batteries. You can read our full solar calculator disclaimer ...
