

Solar Panel tender price in Canada 2025

How much will a solar module cost in 2025?

Some global forecasts even suggested wholesale module prices could stay around that \$0.10/W mark into 2025, though retail prices for homeowners will always be higher due to markups and other costs. Demand is also growing fast, both globally and here in Canada.

How much do solar panels cost in Canada?

The average cost of a residential solar panel system in Canada is around \$2.50 to \$3.50 per watt before incentives. This means that for a 10 kW system, homeowners can expect to pay between \$25,000 and \$35,000 before any rebates or tax credits.

Why are solar panels so expensive in Canada?

The main reason was a surge in manufacturing capacity, basically more panels being made than were immediately needed, leading to intense competition. Since Canada imports a lot of its panels, this global trend definitely put downward pressure on module costs here. But here's where it gets interesting for us in Canada.

What rebates are available for solar panels in Canada?

Offers up to \$5,000 in rebates for solar panel installation. Available to homeowners across Canada. Zero-interest loan up to \$40,000 for energy-efficient upgrades, including solar panels. Must be repaid over 10 years. Net metering available, but no direct rebates. Solar incentives for First Nations communities, plus net metering.

Is solar cost a long-term trend?

The long-term trend for solar costs has consistently been downward. Think about it: module costs are down an incredible 99% since 1980! Continued innovation and economies of scale should keep pushing costs lower over the long haul.

How much can you save with solar in Canada?

Varies by municipality, but up to \$5,000 in rebates available in some areas. Up to \$7,000 in solar grants under the Réno climat program. Solar Homes program offers up to \$3,000 in rebates. Up to \$5,000 in solar rebates for residential systems.
