

Solar batteries maine

Are solar batteries worth it in Maine?

Solar batteries don't make much financial sense for Maine homeowners anyway, because the net metering policy is so consumer friendly that you don't really benefit from hoarding your solar power. None of the utility companies in Maine offer a virtual power plant program for homeowners, either.

Does Maine have solar energy storage?

Since Maine offers a net billing program instead of net metering, solar homeowners are credited for excess energy at a rate lower than the full retail rate. In this case, having solar energy storage could help you save on your electric bills by using excess power stored to power appliances when necessary.

Should I get a solar energy system installed in Maine?

Overall, a solar energy system can be installed in Maine via SunPower or Tesla, but we feel comfortable recommending any of the providers on this list. The table below provides some information on how these companies stack up against one another to help you decide which options might suit you.

How much does solar energy cost in Maine?

The cost of solar energy in Maine is around \$0.16-17 kWh without government subsidies. With all the subsidies, you might be able to approach the standard rate.

How much does a solar array cost in Maine?

The cost of installing a solar array in Maine is around \$21,840 before the federal tax break or \$15,288 after the credit. This assumes an average local cost per watt of \$3.64 and a typical solar electric system size requirement of 6 kilowatts (kW).
