How much do solar storage batteries cost?

Solar storage batteries cost from around £2,500 to well over £5,000. To help you spend your money wisely, our team of researchers analysed 27 market-leading batteries and compared them on key factors such as capacity, warranty and value for money. Find our top eight below. [READ NEXT: The best solar panels for UK homes](#)

Do solar panels need a storage battery?

Storage batteries are becoming increasingly common with solar panel installations. Adding a storage battery to your solar PV system lets you use free solar energy 24/7 - not just when the sun shines. This cuts your annual electricity bill by hundreds of pounds more than solar panels alone.

Should I add a storage battery to my solar PV system?

Adding a storage battery to your solar PV system lets you use free solar energy 24/7 - not just when the sun shines. This cuts your annual electricity bill by hundreds of pounds more than solar panels alone. But while a battery can slash your bills, it's a sizeable upfront investment.

What are the best batteries for a solar-plus-battery system?

Here are the key specs of our top batteries: A solar-plus-battery system can slash your energy bills. You'll get the biggest saving if your battery automatically knows when to store and use solar energy, how much to store, and when to utilise off-peak electricity instead. Duracell's Dura5 battery is brilliant at doing this.

Which solar battery should I buy?

PureStorage from Puredrive is the solar battery to go for if you want to future-proof your home storage against significant temperature fluctuations. It can operate efficiently between -20°C and 60°C. These are temperatures that'll realistically never be hit in the UK, but it doesn't hurt to have a guarantee.

Cotswold Home Solar Welcome to Cotswold Home Solar. If you're considering solar panels (photovoltaic, or PV panels) and/or electricity storage batteries for your home, we want to help you to understand your options, and to find a ...
