What is the West Sussex energy strategy?

We are committed to developing a secure, affordable and sustainable energy supply and using energy from renewable sources. This is set out in the West Sussex Energy Strategy. The County Council generates renewable energy from its land and buildings to reduce energy costs in support of its pledge to try to reach net zero carbon emissions by 2030.

What are solar batteries used for?

The batteries are used to store surplus energy generated by the 26,000 panels at the 7.4MW solar farm. They supply electricity to the grid when it's needed. The solar farm is built on a former landfill site that had no alternative use due to the presence of methane gas.

A Solar PV system, coupled with our Fox ESS battery storage solution, was recently installed in Hampshire. This setup empowers users to harness solar energy, store it efficiently, and utilize it at their convenience, day or night.

With solar battery storage, you can store energy produced during peak daylight hours and use it to help power your home throughout the night. A solar battery system also allows you to control when you draw power from the grid, which is ...
