

# Solar diesel hybrid storage cost vs benefit calculation in Vietnam

Do energy storage systems exist in Vietnam's power system today?

This paper provides an up-to-date review of these storage technologies and energy storage systems in Vietnam's power system today. Finally, there are a few perspectives on the opportunities and challenges of these storage systems in Vietnam power systems today.

Does energy storage reduce fuel consumption in hybrid microgrid systems?

The results in Fig. 7 show the importance of combination of renewable electricity generation (PV) and energy storage (batteries) in reducing fuel consumption in the hybrid microgrid systems. The larger the capacity of the energy storage, the lower the fuel consumption and emissions.

What is the optimum design for a hybrid system?

According to Bernal-Agustin et al., the optimum design is usually carried out by minimizing the Net Present Cost (NPC) or the Levelized Cost of Energy (LCOE) of a project using simulation and optimisation software tools available for hybrid systems.

Why should Vietnam invest in solar power?

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, accelerate grid and battery storage infrastructure, and avoid costly LNG imports by prioritizing renewables.

How to choose a hybrid system sizing?

For a hybrid system sizing should consider the renewable-diesel balance that allows for maximising the use of renewable by the selection of energy sources to supply loads separately or to meet a high demand by combining all the sources at the same time.

Could a coal power plant be retrofitted in Vietnam?

option for Vietnam, according to BloombergNEF analysis. To achieve tangible emission reductions, a coal power plant would have to be retrofitted to be capable of co-firing ammonia with coal at energy ratios above 50%. At such high ratios, electricity generation costs will be far higher than renewables. The same applies to retro
