

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the cumulative capacity to 5.5 GW. This was the best performance ever for the Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

How is storage regulated in Greece in 2022?

In 2022, the Greek Parliament also passed a thorough regulatory framework for storage. Large-scale storage are selected through a bidding process, with a total tendered power capacity of 1,000 MW and at least 2.6 GWh of storage capacity.

When will res projects be auctioned in Greece?

Regarding support schemes, some 4.1 GW of RES projects will be auctioned in Greece between 2023 and 2025, with PV expected to get around 3 GW. In 2022, the Greek Parliament also passed a thorough regulatory framework for storage.

How much solar will Greece have in 2030?

This outshined the expected 13% share of solar in meeting gross electricity demand. Considering current trends, Greece is revising its 2030 national solar target: the new draft target is 13.4 GW by the end of the decade, almost doubling the one previously set. The major bottleneck remains the availability of grid capacity.

How did the weather affect solar power in Greece in 2022?

The bright weather across the country helped solar PV to contribute to some 13.6% of total Greek electricity production in 2022, breaking yet another record. This outshined the expected 13% share of solar in meeting gross electricity demand.

What is the Solar Future Greece Conference 2021?

The Solar Future Greece Conference 2021 combined a crowd of key influential international and local players in the Greek PV market. Discover key insights into the recent growth and potential of the Greek solar market for the upcoming years. Glance at our latest market overview and stay up to date on recent PV developments in Greece.
