

Solar storage inverter project financing options in Netherlands 2026

How to assess the investment plans for wind and solar in the Netherlands?

In order to assess the investment plans for wind and solar in the Netherlands by European utility companies we rely on the investment plans of the large publicly-traded companies and we use the company's existing market share (as per BNEF) to estimate what would be the overall investment if all companies would follow similar investment plans.

How much money does the Netherlands spend on battery energy storage?

Netherlands' climate minister has allocated EUR100 million in subsidies to the deployment of battery energy storage system (BESS) technology.

How much money do banks invest in wind & solar projects?

According to their latest reports, these banks have a current exposure of EUR 11.9bn to project finance in both wind and solar projects, of which EUR 3.6bn is estimated to be in the Netherlands. Of the total amount invested in the Netherlands, EUR 2.5bn were directed to wind projects, and the remaining to solar energy projects.

Are solar PV investments accounted for in a large-scale investment?

For our purpose, we only focus on large-scale investments. That is, solar PV investments by households and building's rooftops are not accounted for in this exercise. The capacity target for offshore wind is 16GW by end of 2030 (2) and 8.8GW for onshore wind. Such targets are associated with huge investments towards 2030.

Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

Will the Netherlands be an emission free power sector by 2035?

Furthermore, the Netherlands aims for an emission free power sector by 2035. The current Dutch electricity mix is heavily dependent on gas and coal generation, with shares of 36.8% and 8.3% in 2023, respectively, as shown in the left-hand chart above.
