

Can solar thermal technology be used in Peru?

Solar thermal technologies show great promise, particularly in regions with high direct normal irradiance (DNI) levels, such as northern Chile and southern Peru. Despite Peru's abundant solar resources that are ideal for the implementation of such technology, solar thermal technology has not yet been introduced in the country.

What is solar thermal energy storage?

Sensible and latent thermal energy storage systems efficiencies over 90%. Solar thermal energy storage is considered one of the key technologies for overcoming the intermittency of solar energy and expanding its applications to power generation, district heating and cooling, and industrial heat supply.

Can solar energy be used in Peru?

Potentialities and Limitations of Solar Photovoltaic (PV) Energy in Peru Solar PV energy advances on a large scale have already been carried out in Peru, as they are environmentally friendly and an attractive option to apply in different geographical locations with solar resource potentialities.

Where are solar energy plants located in Peru?

These regions are part of the Coast Desert of Peru, in which nine photovoltaic solar energy plants are in operation in 2024. Also noteworthy are the northern regions of the country (i.e., Tumbes and Piura and part of the Sechura desert), which, despite their attractive solar resources, have not been used to date.

What is the development of solar PV energy in Peru?

Finally, Figure 21 shows the development over time of the installed capacity in MW of solar PV energy in Peru. Figure 21. Evolution (years) of the solar photovoltaic installed capacity (MW) in Peru. Figure 21 shows that the first stage of solar PV energy in the country began in 2012, with strong growth from 2012 to 2023.

What is the useful solar energy technical potential for Peru?

The useful solar energy technical potential for Peru is equivalent to 25,000 MW. Table 2 shows details of the geographical areas of the country with the greatest average solar energy, where values between 4.00 and 7.00 kWh/m²/day are recorded. Table 2. Geographical areas of Peru with the greatest average daily solar energy .
