

Solid red light on battery tender jr

What does the red light on the battery tender junior mean?

The solid red light on the Battery Tender Junior indicates that the battery is connected properly and the charger is still in the charging stage. If it remains solid red after two days, the battery has not yet completed charging. This could happen if the battery has a large capacity, is deeply discharged, or is not charging efficiently.

Why is my battery tender junior flashing a red light?

If the red light is flashing on your battery tender Jr, that is a clear sign that your charger is connected to the power, and that there are no problems on the charger's AC power end. Review - Deltran Battery Tender Junior - No More Dead Batteries on the Corvette! - YouTube

What does a battery tender junior 800 light mean?

On a Battery Tender Junior 800, a solid amber light indicates the battery is charging. A solid green light means the battery is fully charged and the charger is maintaining the charge. This answer is automatically generated I've had the battery tender on my vehicle for two days and it's still solid red

What does a battery tender indicator light mean?

Flashing red: not charging battery
Solid red: battery charging
Flashing green: battery greater than 80 percent charged
Solid green: monitoring charged battery
This light guide applies to the core line of Battery Tender products, so please check your charger's manual for specific lighting instructions. FAQs about Battery Tender indicator lights

How many volts does a battery read before attaching a tender?

The battery reads 12.7 volts before attaching the tender. I have a battery on the tender right now. The red light is lit solid. It's been on there several hours. I'm not very electrically inclined, but I would think that 12.7 volts is more than 80% charged and the red light should at least be flashing, if not solid green.

Why does my btjr light turn red?

Ensure AC power is available. No indicator lights are lit. NOTE: The BTJR must be connected correctly to both the AC power outlet and the battery before the single LED will come on and turn RED indicating that a normal charge cycle has begun. Battery Tender JR clamps or rings are hooked up incorrectly. Reverse polarity of clamps.

Every time the battery tender red light stays on, it indicates an underlying issue with the vehicle, engine, charger, battery, or the battery tender itself. Therefore, it is highly recommended that you hire a professional mechanic to diagnose the ...
