

Successful bid price of BESS project in Finland 2025

What is the Bess project?

The BESS project is one of the largest of its kind in Finland and is set to provide a variety of services to the nation's power infrastructure for the next 30 years. The main applications will be grid services, such as frequency response, but it can also participate in energy trading on wholesale power markets.

When will the Bess be built?

Construction is expected to start during Q2 2025, with operations of the BESS commencing in 2026. Fu-Gen AG is a Swiss-based renewables developer and independent power producer with a strong track record of developing, financing, constructing, and operating renewable energy assets.

How does Bess work in Finland?

BESS operators can also participate in cross-border markets to provide storage capacity for ancillary services, such as frequency regulation, which helps maintain grid stability and reliability. Ancillary services are currently the primary revenue source for BESS in Finland.

Why does Finland need Bess?

The need for BESS is exceptionally high in Finland because the country has set one of the world's most aggressive climate targets. The government has a legal obligation to reach carbon neutrality by 2035. Renewable energy sources account for over 50% of electricity production, and several renewable projects are being planned or developed.

How many Bess projects are planned in 2024?

For example, Finnish investment company Exilion achieved 40,700 EUR/MW/month in the second half of 2023. In 2024, 113 MW BESS projects are expected to become operational, and 359 MW industrial-scale BESS projects have already been announced for the next five years (Elinkeinoelämä ja Keskusliitto, 2024).

Why do we need a Bess application?

"BESS applications are crucial for the successful transition of energy services from fossil fuels to green energy solutions," said Anton Milner, CEO of ib vogt. "We want to thank the experts at Renewable Power Capital for working with ib vogt to establish a path forward in Finland."

NEW DELHI | 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) project, the largest of its kind in South Asia. ...
