

# Successful bid price of LFP battery system project in Ethiopia 2025

How much does an LFP cell cost in 2024?

The average price of an LFP cell was just under \$60/kWh in 2024. Currently, Greater China has a near monopoly in LFP cell manufacturing, considering the negligible LFP production capacity in Europe and North America. However, LFP production capacity is poised to expand, especially in Europe, through this decade.

How much does a LFP cell cost?

The price of LFP cells is over 20% lower than nickel cobalt manganese (NCM) cells. The average price of an LFP cell was just under \$60/kWh in 2024. Currently, Greater China has a near monopoly in LFP cell manufacturing, considering the negligible LFP production capacity in Europe and North America.

Are lithium iron phosphate batteries the future of EV batteries?

Lithium iron phosphate (LFP) batteries now comprise nearly half of the global EV battery market, with China leading adoption, where they met nearly three-quarters of domestic battery demand in 2024. The report states that LFP batteries reached 80% of the batteries sold in China during November and December.

What factors influence BESS prices battery technology?

Key Factors Influencing BESS Prices Battery Technology: Lithium-ion batteries dominate the market, particularly Lithium Iron Phosphate (LFP) and Nickel Manganese Cobalt (NMC) chemistries. LFP has become more popular than the other due to its lower cost and longer lifespan.

Are LFP batteries good for EVs?

"However, LFP batteries have now reached a performance level sufficient for most EV applications, making their lower cost a key advantage for automakers aiming to mass markets." Electric vehicle battery sales share by chemistry and region, 2022-2024. Courtesy of IEA. Licence: CC BY 4.0

Will LFP increase the global average price of LFP cells?

The addition of LFP capacities outside of Greater China will raise the global average price of LFP cells in the midterm, but as the manufacturing cost is brought under control through process improvements, the global LFP average cell price will gradually fall below the current level.

According to a recent report released by Goldman Sachs, the global average battery price has dropped from \$153/kWh in 2022 to \$149/kWh in 2023. Goldman Sachs predicts that by the end of this year, the price is expected to fall to ...
