

Successful bid price of Solar Panel project in Poland 2025

How many solar projects were approved in Poland in December?

Poland's URE has shared the results of seven renewables auctions that took place in December. An auction for solar and wind installations greater than 1 MW received 172 solar bids and two onshore wind bids. It approved 126 solar projects totaling around 1,481 MW and the two wind projects totaling 90.8 MW.

How much solar power is installed in Poland in 2020?

In 2020, 2635 megawatts (MW) of solar power output was installed in Poland - more than thrice as much as in 2019 (823 MW). This put Poland's PV market in fourth place in Europe, behind Spain (2.7 GW), the Netherlands (2.8 GW) and Germany (4.8 GW). The cumulative installed PV power was 3935 GW. And all signs point to further strong growth.

How much solar power will Poland have in 2024?

The cumulative installed PV power was 3935 GW. And all signs point to further strong growth. The Polish solar market is set to grow by 35 percent annually in the coming years, so that by 2024, the total PV capacity will have reached 8.3 GW.

How much solar power does Poland have?

Figures from URE show that since Poland's renewables auctions began in 2016, more than 274 TWh of electricity worth almost PLN 67 billion has been contracted, with the vast majority covering newly designed installations. Poland added around 4.6 GW of solar in 2023, taking its cumulative installed capacity beyond 17 GW.

How many solar projects were approved?

In the auction for projects greater than 1 MW, 172 bids were submitted for solar, while only two bids were made for onshore wind. A total of 126 solar projects, amounting to approximately 1,481 MW, were approved, alongside two wind projects totaling 90.8 MW.
