

Successful bid price of commercial energy storage project in Indonesia 2030

Why is battery energy storage system important in Indonesia?

However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is a growing intermittency issue that hampers the development of solar and wind generation. Hence, the battery energy storage system (BESS) technologies have a critical role in the development of Indonesia's renewable energy.

What are some potential energy storage projects in ASEAN?

Other potential energy storage projects are the Cirata projects--the largest floating solar planned for ASEAN at 145 MW in Purwakarta region, West Java and eastern parts of Indonesia such as 2x50 MW in Bali and 70MW in the new capital, the city of Nusantara, East Kalimantan.

Which provinces are a potential site for energy storage construction?

In our model, eleven provinces were identified as potential sites for energy storage construction. According to the RUPTL (PLN, 2021), an operational capacity of 300 MW of energy storage is anticipated by 2030, primarily in Lampung and North Sumatra.

NEW DELHI | 8 May, 2025 -- The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone Battery Energy Storage System (BESS) project, the largest of its kind in South Asia. ...
