

Successful bid price of containerized BESS project in Spain 2026

How many Bess projects are there in Spain?

In March 2025, UK companies Renewco and Atlantica announced the development of up to 2.2GW of BESS projects across Spain. Other projects in the pipeline primarily involve storage co-located with solar or wind generation. According to BloombergNEF, the total capacity currently in the BESS pipeline is around 3GW.

What is the current situation of the Spanish Bess market?

The current situation of the Spanish BESS market confirms that both of these factors are required to gain market attraction: Despite a high penetration of renewable energy, the Spanish regulatory framework has been lagging and the first BESS projects of significant size have yet to be built.

What is a Bess project?

BESS are becoming a key component of the European electricity system, providing much-needed flexibility by storing surplus renewable energy and supplying it during peak demand. However, market conditions for BESS projects vary across countries and continuously change with the progression of the energy transition.

Does Spain need a Bess energy system?

Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country. As a result, the need for BESS to integrate renewable energy sources into the electricity system is less immediate than in the UK, for example.

Why is Bess less urgent in Spain?

Another reason the integration of BESS is less urgent in Spain is the high resilience of the Spanish grid, despite its low level of interconnection. The Spanish TSO operates a very solid matrix-design grid, which includes a system for technical restrictions centrally operated in the Renewable Energy Control Centre (CECRE).

What are the benefits of a Bess system?

On BESS systems They offer multiple benefits that position them as an effective solution for energy storage: Flexible and suitable: BESS systems can be adapted to different scales, from residential applications to large-scale installations, allowing flexible integration into existing energy infrastructure.

Whether you need a bare-frame BESS enclosure /rack, a semi-integrated solution or a fully wired, grid-ready BESS unit, TLS Energy delivers the expertise -- from design to EPC hand-over -- to make your energy storage project profitable, ...
