

Successful bid price of large scale battery storage project in Germany 2026

How much battery storage will Germany have in 2026?

Industry body the Bundesverband Solarwirtschaft (BSW-Solar) expects around 7 GWh of large-scale battery storage to be added during that period. From ESS News German solar trade body BSW-Solar expects the capacity of large battery storage systems installed in Germany to increase fivefold by 2026.

Why should you invest in large-scale battery storage systems in Germany?

The German market is currently very attractive for investments in large-scale battery storage systems. Therefore, we work together with our customers and partners on the successful implementation of our projects, thus creating the Basis for future-proof and sustainable value creation.

How do large battery storage systems support the energy transition in Germany?

Large battery storage systems support the energy transition in Germany, as they store electricity from renewable energy sources and make it more efficiently usable. This increases the share of green electricity in gross consumption and reduces the likelihood of having to resort to emergency power from fossil fuels during peak demand periods.

How big is the battery storage market in Germany?

The Market for large battery storage systems in Germany has grown immensely in recent years. In 2023 alone, sales rose Federal Association of Energy Storage Systems (BVES) by 46% compared to the previous year, to more than 15,7 million euros.

How many battery storage systems were installed in 2024?

A current inventory of the Federal Association of the Solar Industry shows that almost 2024 stationary battery storage systems were newly installed in 600.000, resulting in approximately 1,8 million battery storage systems with a total capacity of 19 GWh.

Why is battery storage important in Germany?

Half of the electricity in Germany is currently generated from renewable energies. In the next few years, this share is expected to increase BMWK to over 80%. The more electricity from renewable energies is added to the grid, the greater the need for storage options. Large battery storage systems in Germany can meet this demand.

In Hungary, up to 45% of the project costs for large-scale battery storage are covered by grants, in addition to a CfD program and grid connection facilitations. See also: Central & Eastern Europe - Utility-scale storage market ...
