

Successful bid price of residential ESS project in Malaysia 2026

Why is Malaysia launching a Bess project?

The inaugural development of public BESS project in Malaysia is part of the Government's efforts to support the energy transition and achieve the goals of increasing the country's installed renewable energy capacity to 70% and to achieve net-zero by 2050.

How will Bess development impact Malaysia?

BESS development is expected to create new economic opportunities with an estimated investment value of RM2.8 billion. Petra expressed confidence that the initiative will strengthen the resilience and flexibility of Peninsular Malaysia's grid system, enabling it to accommodate greater capacity for renewable energy (RE) in electricity supply.

Should foreign players participate in Bess projects in Malaysia?

Nevertheless, given that the development of BESS projects in Malaysia is still at an early stage, participation of foreign players with experiences in energy storage system projects may be crucial to support and encourage further projects of the same nature to be developed in the Malaysia energy market in the future.

How will LSS6 & Bess work in 2026?

Petra said LSS6 and BESS are expected to further increase the capacity of renewable energy in the national electricity supply system and supply grid, respectively. Both the LSS6 and BESS programmes are scheduled to be operational in 2026, according to EC.

What is the capacity of EC's Bess project?

The total capacity to be acquired is 400MW/1,600MWh. In this regard, EC invites companies or consortiums that are experienced in implementing projects related to energy generation, and have the technical and financial capabilities to develop, finance, and operate energy storage systems to participate in the BESS project.
