

Successful bid price of solar diesel hybrid storage project in Australia 2025

Did Australia invest in energy storage projects in Q1 2025?

Australia's remarkable run of investment commitments to energy storage projects continued in Q1 2025. Six storage projects representing 1,510 MW (capacity) /5,016 MWh (energy output) reached financial close - the second-highest quarterly result for newly financially committed storage projects.

Is Australia's largest hybrid solar & storage project ready?

Renewables developer Elements Green says the start of construction for what it describes as Australia's largest hybrid solar and storage project to date is now within reach after receiving the tick of approval for grid connection.

Will SMA be the largest NEM-connected solar & battery hybrid project in Australia?

"It will be the largest NEM-connected solar & battery hybrid project in Australia, and its successful development thus far clearly demonstrates how SMA's grid-forming technology can be scaled to meet the NEM's needs.

How many storage projects are there in Australia?

There are also 69 committed storage projects (either standalone or hybrid projects) currently in this pipeline, equivalent to 12,532 MW /32,078 MWh in capacity /energy output. Read the latest updates from the Clean Energy Council and across the industry. When it comes to Australia's energy future, communities have legitimate questions.

Will Australia's NEM see a massive increase in battery energy storage capacity?

Australia's NEM will see a massive increase in grid-scale battery energy storage capacity in the next three years. There are 16.8 GW of battery projects that could come online in the National Electricity Market (NEM) by the end of 2027.

How many new battery and virtual power plant projects did CIS tenders select?

The joint tender selected six new battery and virtual power plant projects that will deliver more than 1 GW of capacity in the National Electricity Market (NEM) and create 400 jobs. The subsequent CIS tenders are presented in the following table.

Located in Queensland, the Dalby project is one of Australia's first hybrid PV and Battery Energy Storage Systems (BESS) projects in operation. The project is a PV installation with an output of 2.45 MWdc and a BESS with ...
