

Successful bid price of standalone energy storage project in Ireland 2025

How much wind energy is wasted in Ireland?

According to Energy Storage Ireland, 14% of all wind energy generated in Ireland last year was wasted due to lack of storage. Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland.

How good is Ireland's energy storage strategy?

Smith pointed out that Ireland's energy storage strategy, published in 2024, was "quite positive." A lot of high-level plans and a technology agnostic outlook. "Unfortunately, we haven't seen a lot of progress on those actions which is a problem we are trying to address," said Smith.

Are hybrid sites a good idea for Ireland?

This report by Cornwall Insight examines the potential for hybrid sites (i.e. energy storage co-located with wind or solar pv) on the island of Ireland and the benefits these can bring to the grid and to consumers through reduced curtailment of renewable energy, lower energy costs and avoided carbon emissions. January 2025

Which energy storage companies are working in Ireland?

Statkraft delivered the first energy storage project in Ireland with Fluence in 2020, at its Kilathmoy wind farm and the company has continued to have a strong presence in the Irish energy storage field since then. The company is also lining up another milestone project soon, with the country's first four-hour duration energy storage system.

What challenges does Ireland's Bess market face?

According to Bobby Smith, head of Energy Storage Ireland (ESI), one of the main obstacles Ireland's BESS market faces is the lack of route to market for battery operators. "A lot of energy storage has crept under the radar so far in Ireland," he told ESS News. Developers secure planning quite easily but the route to market is a challenge.

Is energy storage a game changer for Ireland & Northern Ireland?

May 2022 Baringa Partners show that energy storage is a game changer for Ireland and Northern Ireland's renewable energy ambitions in terms of its ability to manage renewable oversupply, reduce CO2 emissions, provide low carbon capacity and reduce costs to consumers.
