

The 7th energy storage project

When was the 7th strategic energy plan made?

Following this, a Cabinet Decision was made on the Seventh Strategic Energy Plan on February 18, 2025, today, after going through the Public Comment Procedure and other processes. 2. Outline Since the previous revision of the Strategic Energy Plan in October 2021, the energy situation surrounding Japan has changed dramatically.

When was a cabinet decision made on the 7th strategic energy plan?

The Ministry of Economy, Trade and Industry (METI) hereby announces that a Cabinet Decision was made on the Seventh Strategic Energy Plan on February 18, 2025, today, following the Public Comments Procedure and other processes. 1. Background

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.

What is energy storage technology?

Energy storage technology allows for a flexible grid with enhanced reliability and power quality. Due to the rising demand for energy storage, propelled further by the need for renewable energy supply at peak times, energy storage facilities and producers have grown tremendously in recent years.

Why is energy storage important?

Energy storage serves important grid functions, including time-shifting energy across hours, days, weeks, or months; regulating grid frequency; and ensuring flexibility to balance supply and demand.
