

Total investment cost of wall mounted battery project in Indonesia

How much did Indonesia invest in the EV battery project?

With a staggering investment of USD 5.9 billion (approximately IDR 96 trillion), the project marks a monumental step in placing Indonesia at the forefront of the global EV battery supply chain and advancing its green energy ambitions.

What is the Indonesia Battery Integration Project?

The ambitious \$6 billion Indonesia Battery Integration Project, launched July 1 by Chinese battery giant CATL and local partners, represents more than just another overseas investment -- it marks a fundamental shift in how the world's electric vehicle batteries will be made, recycled, and controlled for decades to come.

How will CATL's \$6 billion battery project impact China?

CATL's \$6 billion Indonesian battery project integrates nickel mining to recycling, reshaping global EV supply chains and strengthening China's dominance.

Why is CATL launching a massive EV battery operation in Indonesia?

CATL, the world's largest EV battery maker, is planning a massive operation in Indonesia to support the country's growing electric vehicle market.

Is China bringing EV batteries to Indonesia?

Indonesia is powering up, and China's Contemporary Amperex Technology intends to provide the storage capacity. CATL, already the world's largest EV battery maker, is planning to expand its operations into Indonesia. Activity will focus on the entire pack lifecycle, "from mining to recycling," per Battery Technology.

Why did LG invest in Indonesia battery factory?

LG's investment in Indonesia battery factory occurs against a backdrop of intensifying global competition in battery manufacturing, with industry overcapacity concerns growing as numerous manufacturers expand production simultaneously.
