

Total investment cost of warehouse solar storage project in New Zealand

How long does a solar system last in New Zealand?

Typical payback periods in New Zealand range from 4 to 7 years, depending on the system size, energy usage profile, location, and export arrangements. After that, most systems continue generating cost savings for 15-20+ years. Solar also delivers a more predictable energy cost over time.

Are commercial solar systems delivering real results for New Zealand businesses?

From horticulture in Hawke's Bay to logistics in South Auckland and processing in Canterbury, commercial solar is already delivering real results for New Zealand businesses. These systems are built to match the demands of each site - scalable, efficient, and designed with operational realities in mind. 3.

Is solar a good investment for your NZ Business?

For many NZ businesses, solar delivers a compelling outcome on both fronts - particularly when long-term savings are paired with improved cash flow, sustainability gains, and protection against future electricity price rises. Not every business wants to pay for a solar system upfront - and that's fine.

How much does a commercial solar system cost?

As a rough guide, the cost of a commercial-scale solar system is likely to be in the range of \$1500-2000 per kW of installed capacity. The cost per kW tends to be cheaper for larger scale systems. For a smaller 10kW system, this could mean a price of around \$20,000, while for a larger 100kW system, this could mean a price of around \$150,000.

What are the different types of commercial solar systems in NZ?

Below are the four most common system types seen across NZ commercial properties. Rooftop solar is the most widely adopted commercial solar solution - and with good reason. It makes use of existing space, avoids the need for resource consent in most cases, and allows businesses to generate power right where it's used.

How many solar centres are there in New Zealand?

ross eight New Zealand centres, comprising a total of 144 individual sites. It has found that it is difficult to definitively identify a particular business or load type likely to benefit from solar across the eight centres, or by characteristics of electricity consumption

The Upfront Costs of Solar Installation Having solar installed on your warehouse roof may reduce your monthly energy bills. And solar can provide a great benefit in taking a warehouse into a more sustainable future if planned properly. But ...
