

Total investment cost of wind solar storage project in Switzerland

Where in Switzerland can wind and solar energy be generated?

The calculation revealed that the greatest potential for the generation of wind and solar energy lies in the western half of Switzerland - especially around the cities of Geneva, Lausanne and Berne.

Is solar energy better than wind energy in Switzerland?

Their calculations also show that solar energy in Switzerland has greater potential than wind energy: it is more cost-efficient and predictable and is more readily available. An interesting finding: renewable energies ease the load on the electricity grid and reduce the risk of outages.

What is the potential of a roof-top PV system in Switzerland?

Since April 2019, it also includes the potential of facades of 17 TWh. This potential is considered somewhat optimistic. A more detailed analysis estimates the Swiss roof-top PV potential to be 24,9 TWh. Therefore, the potential of facades and other surfaces (parking, floating PV,...) will probably need to be exploited.

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience, the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

Does energy storage improve wind power capacity credit?

Energy storage substantially improves the capacity credit of wind power from 4% to 26%. Levelized cost of hybrid systems assessed across different supply modes and scales. Optimal choice for a hybrid system depends on the scale rather than supply strategy. Levelized cost of utility PV & Li-ion battery systems could reduce by 30% by 2030.

What are the applications of PV in Switzerland?

Applications of PV in Switzerland are primarily roof-top grid-connected PV systems. Off-grid, ground-mounted, VIPV applications are still very scarce while an increasing number of building integrated and facade PV projects can be observed.
