

Will Italy invest 1 billion in Bess by 2030?

The Italian government has announced plans to invest EUR 1 billion in BESS by 2030. The investment will be used to support the development of large-scale BESS projects and to improve the integration of renewable energy into the grid. The Italian utility company Terna has launched a tender for 100 MW of BESS capacity.

How does Bess manage peak demand in Italy?

Management of Peak Demand: The pronounced peak demand for electricity in Italy during peak hours can strain the grid. BESS play a role in managing this peak demand by supplying stored energy when needed, reducing grid stress and minimizing the use of fossil fuel-based peaker plants.

What policies bolster the Italy Bess market?

Some notable policies bolstering the Italy BESS market include: Italian National Energy and Climate Plan (PNIEC): Italy's PNIEC outlines the country's energy and climate goals, including targets for renewable energy expansion and greenhouse gas emissions reduction.

What ancillary markets can Bess operators participate in in Italy?

Participation in Grid Services and Ancillary Markets: BESS operators in Italy can actively participate in grid services and ancillary markets. This encompasses providing services like frequency regulation, voltage support, and spinning reserves to enhance grid stability and reliability.

In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of INR3.32 per unit--5.8 per cent lower than the rate discovered in a similar tender by SECI in ...
