

Where is the electric vehicle energy storage industrial park

How will Entek's new campus help EV production?

The campus, which will be fueled in part by a \$200 million grant from the U.S. Department of Energy (DOE) as part of the recent Bipartisan Infrastructure Law, will help ENTEK to scale its U.S. production, capable of supplying 1.4 to 1.6 million EVs annually by 2027.

Can Entek help make electric vehicles in Indiana?

As the only American company to own and produce 'wet-process' lithium-ion battery separator materials, ENTEK is going to help to pave the way for electric vehicle production in Indiana and reduce American manufacturers' reliance on imported products.

Are battery energy storage systems regulated in New York City?

Battery energy storage systems in New York City are rigorously regulated, with oversight from the safety industry, federal, state, and local authorities. All code, location, spacing, and other local requirements must be met.

How will a 100MW battery energy storage system work?

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the 100MW battery energy storage project will be able to discharge electricity to the grid particularly during peak demand.
