

# Wholesale MW scale storage system price list in Bulgaria

How much does a 1 MW battery storage system cost?

Given the range of factors that influence the cost of a 1 MW battery storage system, it's difficult to provide a specific price. However, industry estimates suggest that the cost of a 1 MW lithium-ion battery storage system can range from \$300 to \$600 per kWh, depending on the factors mentioned above.

How much battery energy storage capacity does Bulgaria have?

Bulgaria has installed between 40 MWh and 50 MWh of battery energy storage capacity to date. However, new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility (RRF) could add another 1 GWh of storage capacity over the next two years.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years.

Renalfa IPP has started the commercial operation of its first utility-scale battery energy storage system. The 25 MW - 55 MWh facility in the town of Razlog in southwest Bulgaria is colocated with a 33 MW photovoltaic ...

The storage system is part of the largest hybrid park within the EU, which also has a photovoltaic plant with a capacity of 106 MW. It is connected to the first and only licensed closed distribution network in Bulgaria in the "Balkan Industrial ...
