

What is the energy sector in Zambia?

ZAMBIA'S ENERGY SECTOR OVERVIEW Zambia's energy resources include electricity (hydropower), petroleum, coal, biomass and renewable energy. It is only petroleum which is wholly imported in the country. The Energy Sector in Zambia consists of three main sub-sectors namely: Electricity, Renewable Energy and Petroleum. **ELECTRICITY SUB-SECTOR**

Why should we invest in solar and wind power projects in Zambia?

Furthermore, utility-scale wind and solar projects have the potential to contribute significantly to the electrical grid as electricity demand rises and the economic viability of these projects improves, thereby enhancing energy mix diversification and supporting Zambia's broader energy goals.

Why do we need to map Zambia's energy sector?

By identifying and prioritizing key opportunities within Zambia's energy sector, the mapping exercise directly supports the plan's goals of economic diversification, sustainable development, improved livelihoods, and environmental sustainability.

How can commercial and industrial sectors improve energy efficiency in Zambia?

The commercial and industrial sectors in Zambia show significant potential for increased energy demand for various energy use applications and opportunities for energy efficiency improvements, driven by the need for reliable power supplies, cost savings, access to markets, and alignment with national strategies.

Why should SMEs invest in the energy sector in Zambia?

Zambia's residential and public sectors present an opportunity for SMEs and investors in the energy sector, driven by rapid urbanization, rising living standards, and ambitious government electrification and sustainable development goals.

Why should investors invest in Zambia's mining sector?

Investors serving Zambia's mining sector can seize opportunities by adopting energy-efficient and renewable solutions, ensuring reliable energy access, operational efficiency, cost savings, and environmental sustainability. Energy demand in the mining sector is projected to grow from 886 MW in 2020 to 2,052 MW by 2050 according to Zambia's IRP.
